

Supervised PhD students

current

Advisor: Thi Vien Nguyen, Kevin von Bargen, Mandala von Westenholz

Co-advisor: Kinga Nagy, Tim Wollschläger

- 2020 Alexandros Grosdos Koutsoumpelias, *Algebraic Methods for the Estimation of Statistical Distributions.*
- 2018 Thi Van Anh Nguyen, *On Partial Regularities and Monomial Preorders.*
- 2016 Van Dinh Le, *The broken circuit complex and the Orlik-Terao algebra of a hyperplane arrangement.*
- 2013 Dinh Phong Thieu, *On graded ideals over the exterior algebra with applications to hyperplane arrangements.*
- 2012 Dang Hop Nguyen, *Homological and combinatorial properties of toric face rings.*
- 2011 Kirsten Schmitz, *Generic Tropical Varieties.*
- 2010 Gesa Kämpf, *Module theory over the exterior algebra with applications to combinatorics.*
